A UNIQUE PRODUCT CREATED BY OUR ARTISANS IN OUR WORKSHOP

For more than 30 years, Décors Véronneau has specialized in the creation of unique trees. All of them are handmade and assembled in our workshop with natural trunks and quality artificial foliage. It is then possible to recreate many different varieties of trees. One of the main advantages of the artificial? Enjoying the beauty of trees without maintenance!

Why choose a custom handmade tree?

Whether you prefer a ficus or an olive tree, green foliage or red foliage, all our tree models can be made to your specifications and dimensions.

More advantages :

- ✓ Handmade in our Laval workshop
- ✓ Designed with recycled real tree trunks
- ✓ Large selection of foliage available
- ✓ Quality polyester foliage
- ✓ Maintenance-free, no watering
- ✓ Natural and realistic look
- ✓ Durability
- ✓ Know-how of our local craftsmen

OUR EXPERTS

Commercial design team

Our team of experienced sales representatives undertakes every project in a spirit of collaboration. Our expertise and commitment allow us to turn your ideas and concepts into reality!

Tree makers

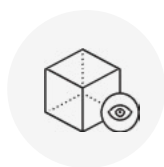

Décors Véronneau also has a dedicated team of skilled tree makers in its workshop.

TURNKEY SERVICE

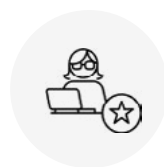

Whether for an office, apartment complex, showroom or restaurant terrace, our experienced design team can create any type of commercial spaces.

MANUFACTURING STEPS

The tree manufacturing process remains essentially the same for models with several trunks on the ground, as for models sitting in planters or boxes. It is also possible to create a custom wooden structure to conceal the metal base.

Custom tree with metal base :

- 1 In our workshop, our team adds the main trunk inside the metal base tube to which several other branches (often twisted) are added to conceal it ;
- 2 Medium and smaller branches are then put in place. For larger trees, the rest of the fabrication can be carried out at the customer's location for a realistic effect ;
- 3 Holes are drilled for adding foliage stems, which are also in place for added strength ;

- 4 Our cleaning product is sprayed all over the tree to prevent dust from building up.

In addition to the metal base for creating a tree where the trunk touches the ground directly, it is also possible to make a wooden box as a base. It can then be stained if needed.

It is also possible to choose a planter from our wide selection, available in several materials such as fiber cement, ceramic, cement, plastic, etc.

CHOICE OF MATERIALS

NATURAL WOODEN BRANCHES

TYPES OF WOOD USED

The appearance of natural branches is unique, making it an exceptional product. You can also choose the thickness of the trunks used. Natural wood can also be painted.

Dragonwood

Dark brown hardwood with visible bark.

Popularity +++
Price +

Ghostwood

Sandblasted, smooth, light wood. Can be painted if required.

Popularity ++

GREENERY AND FLOWERS

REQUIRING NO SUN EXPOSURE!

The leaves are made of polyester. A large selection of quality foliage is available.

Olive tree

Airy foliage with olives.

Fiddle-leaf

Large and lush green leaves

Acacia

Lime-green foliage in small clusters

Camellia

Delicate medium-green foliage

Ficus

Lime and dark green foliage available.

Aralia ming

Fairly dense and thorny dark green foliage.

Bougainvillea

Colorful flowers and delicate green foliage.

Cherry blossom

Exotic flowers also available in pink.

Hibiscus

Tropical flowers and green foliage.

THE FINAL TOUCH

IF NEEDED

Moss

A carpet of moss that can cover the base of your tree while giving it a natural, lush look.

Mulch

Natural brown wood mulch can also make a beautiful natural carpet.

Decorative pebbles

Small polished rocks to give your tree a modern look.

A QUICK AND EASY INSTALLATION

A part of our handmade trees is assembled in our workshop by our craftsmen. The remaining work can be done during installation, so that the result can be as natural as possible.

Installation - Pigeon Club Café

MAINTENANCE

Manufactured trees require minimal maintenance. Each year, all you have to do is remove the dust with a dryer and spray them with an artificial plant cleaner to restore their original shine.

A UV protection spray should be applied every year to trees whose leaves are exposed to the sun's rays through a window.
